

# GREEN MUSH™

---

THE ULTIMATE SUPERFOOD™  
FOR YOUR  
ANIMAL COMPANION

Green Mush™ is an extremely potent and comprehensive array of nature's most nutritive and cleansing superfoods. The ingredients – an amazing combination of green algae, sea vegetables, green grasses, and other superfoods – are dried at a low temperature to retain life force, enzymes, and maximum nutrient value. Green Mush™ contains thousands of phytonutrients, vitamins, minerals, trace minerals, antioxidants, proteins, and amino acids. These nutrients are entirely bioavailable because they are exactly as they occur in nature: the ingredients are whole plant foods. Nutrient assimilation is further aided by a digestive enzyme blend and probiotics.

Compassion Circle begins with the best ingredients nature has to offer – ENTIRELY pesticide free and containing NO genetically modified organisms (non-GMO!). Ingredients must pass actual tests to verify non-GMO status and ensure they are 100% free of pesticides and irradiation. Green Mush™ is gluten free and vegan. To preserve this natural goodness, Green Mush™ is bottled in amber glass with metal lids and oxygen absorbers.

Even our animal companions eating healthy, home-prepared meals have a dilemma. Soil depletion from modern farming methods has robbed many foods of crucial micronutrients, such as minerals, vitamins, antioxidants, enzymes, and phytonutrients. Green Mush™ is the answer to this problem! This collection of micronutrient-rich foods can be considered nature's own multivitamin. Green Mush™ is richly endowed with essential amino acids, antioxidants, chlorophyll, soluble and insoluble fibers, tens of thousands of phytonutrients, and much more.

The therapeutic benefits of the antioxidants in Green Mush,™ such as CoEnzymeQ10 and phycocyanin from spirulina, a huge benefit to your animal. Antioxidants slow the aging process and support heart health.\* Specifically, CoEnzymeQ10 is recommended by many as part of a regiment for heart disease treatment. Antioxidants also reduce inflammation in the body.\* A great number of health issues our companion animals face stem from inflammation and chronic inflammation, such as allergies and dermatitis, arthritis, heart disease, kidney issues, thyroid issues, dental issues, and even cancer. Green Mush™ has been reported to help clear up skin conditions related to allergies, improve arthritis, and even improve hip dysplasia and hind leg paralysis.

Each ingredient in Green Mush™ offers therapeutic or health benefits. The minerals and phytonutrients increase the body's resistance to degenerative illness and disease.\* The same ingredients provide iodine for thyroid health, important trace minerals from the ocean, and radiation and heavy metal chelation.\* The fibrous cell wall of chlorella binds with toxins and helps carry them out of the body.\*

The chlorophyll in chlorella oxygenates the blood and increases energy production. This enhances detoxification in cells by allowing cells to release toxins more readily.\* This oxygenation cleanses the blood of microbials and boosts the immune system.\* Chlorella contains Chlorella Growth Factor

("CGF") which is a phytonutrient containing amino acids, polysaccharides, beta-glucans, vitamins, and an abundance of nucleic acids (RNA and DNA). CGF appears to support the RNA/DNA functions responsible for the production of proteins, enzymes, and energy at the cellular level, thereby stimulating a number of benefits, including cellular repair and detoxification, immune function, the growth of friendly intestinal bacteria, and the efficient use of oxygen in cells.\*

Spirulina is arguably the most therapeutic superfoods on the planet. It is a rich source of gamma linolenic acid ("GLA"), an omega-6 fatty acid.\* GLA is a crucial part of the structural fats that comprise muscle tissue, bone marrow, cell membranes, and the brain and nervous systems. GLA is involved in both brain growth and function. Spirulina is also rich in phycocyanin which has potent antioxidant properties and protects and supports kidney health.\* Phycocyanin also stimulates the stem cells that are the origin of all white blood cells, thereby increasing the number of immune cells in the body and supporting immune function.\*

The six strains of probiotics in Green Mush™ (Lactobacillus plantarum, Lactobacillus paracasei, Lactobacillus rhamnosus, Lactobacillus salivarius, Streptococcus thermophilus, Lactobacillus bulgaricus) support immune function by optimizing gut flora and fauna. Fiber further helps feed friendly bacteria and promote health in the GI tract.\* The digestive enzyme blend (protease, alpha-galactosidase, amylase, cellulase, lipase, bromelain, papain) increases nutrient absorption and aids digestion.

Green Mush™ is great for dogs, cats, rats, rabbits, guinea pigs, hamsters, mice, ferrets, squirrels, other mammals, and human animals, too! When feeding to cats, add cranberry powder to the diet to counter the alkalinity of Green Mush.™

**INGREDIENTS (Vegan, Pesticide Free, and 100% Pure):** Spirulina Manna™, Broken Cell Wall Chlorella Manna™, Nettle Leaf, Carob Pod, Whole Leaf Wheatgrass, Icelandic Kelp, Horsetail (Shavegrass), Burdock Root, Alfalfa Leaf, Nova Scotia Dulse Leaf, Plant Source Digestive Enzyme Blend (Protease, Alpha-galactosidase, Amylase, Cellulase, Lipase, Bromelain, Papain), Ginger Root, Whole Leaf Nopal Cactus, Co-enzyme Q10, Probiotics (Lactobacillus plantarum, Lactobacillus paracasei, Lactobacillus rhamnosus, Lactobacillus salivarius, Streptococcus thermophilus, Lactobacillus bulgaricus)

**SUGGESTED USE:** Mix approximately one part powder to two parts purified water, fresh juice, or fruit such as a banana (for flavoring) to make a mush. Small animals, like rats, can eat it this way as a meal. For other animals, Green Mush™ can be mixed into their normal foods (you may need to add water because Green Mush™ is a dry powder). If possible, avoid serving at the same time as antibiotic substances due to the probiotics in Green Mush.™ Daily serving depends upon size of animal. Examples are: Rats: 1/8 teaspoon; Rabbits, Cats,\* Etc.: 1 teaspoon; Small Dogs (5-20 lbs.): 1-2 teaspoons; Medium Dogs (20-45 lbs.): 2 teaspoons to 1 tablespoon; Large Dogs (45 lbs. or more): 1 tablespoon.

\*When feeding to cats on a plant-based diet, add cranberry powder or Compassion Circle's VegeYeast to the diet to counter the alkalinity of Green Mush.™

**SUGGESTED ADJUNCTS:** A whole foods, organic/non-GMO vegan diet (visit [VeganPets.com](http://VeganPets.com) for more dietary information), including specific supplements (if necessary) for your species of animal, clean purified water, fresh air, full-spectrum light, physical exercise, and lots of love. We wish you and your companion animals great health and happiness always!
